

ARTISANAL CONSOLE TABLE

SKU: INSP-CO100

French 17th Century wooden parquet floor panels inspire the Hand Pieced Artisanal Collection. The Artisanal comes from the French word parchet, meaning a small enclosed space. Artisanal floor became a work of art over time; glued into 3 ft. squares these hand cut pieces of wood were scraped, scrubbed, sanded and polished. Complete designs were created laying the wooden floors, taking much time and skill. This made parquet floors extremely expensive and they appeared only in the homes of the most affluent and royal families. The handmade skillful finish of the Hand Pieced Parquet collection reflects the craft of those who spent long hours laying parquet floors, and the grandeur of the bygone era of the 17th Century royals. Wire brushed open grain elm on gunmetal iron base.
