

TEMPUR FLEX ELITE MATTRESS

SKU: TEMP102

TEMPUR® Material isn't like ordinary memory foam. Every Tempur-Pedic mattress is made with the same pressure-relieving material originally developed by NASA to absorb the g-force of astronauts traveling to space — and perfected by our scientists for sleep.

Faster-adapting support, a hybrid feel, and cooling comfort. Traditional bounce and support comes from cushioned spring coils in the core, wrapped in layers of soft TEMPUR® material for plush comfort on top.
